

Malabar Road

Recommendations:

Upgrade traffic lights
 Extend merge lane and widen slip lane
 Improve footpath

Why these recommendations?

The revised merge design aims to improve traffic flow associated with the brief merge distance and the queuing of vehicles awaiting a right turn.

The introduction of a median serves to enhance the area's identity and beautify the streetscape.

Note that the proposed treatments also address the historical collision trend at the intersection of Malabar and Maroubra Road, primarily associated with cross traffic to and from Malabar Road, causing moderate injuries.
