

Anzac Parade (Maroubra Junction)

Recommendations:

New left turn only lanes onto Anzac Parade
 Investigate the implementation of a 40km/h High Pedestrian Activity Area between Hannan and Garden Streets

Why these recommendations?

The corridor upgrade will enhance connectivity in the vicinity. It will also introduce speed control measures in zones with high pedestrian traffic, promoting a safer environment for all. Note that the proposed treatments will also address the historical collision trend involving pedestrian at the intersection of Anzac Parade and Maroubra Road. These crashes are primarily right-through collisions from Maroubra Road to Anzac Parade, with most on the eastern carriageway.
