

CONCEPT PLAN

Install a maze constructed out of recycled plastic on a mulch surface. Surround the maze with native plantings, to provide shelter from the southerly sea breeze and provide additional 'hiding' and 'seeking' play elements.

Softfall surfaced play area with large swing set unit.

Provide access adjacent to the roundabout with a mulch surface and picnic palette tables under the existing tree canopy.

ANZAC PARADE ROUND ABOUT

DESIGN STATEMENT

Play allows children to use their creativity while developing their imagination, dexterity, and physical, cognitive, and emotional strength. The intention of this playground is to provide play opportunities for toddlers through to primary school aged children.

The key play elements in this playground focus on catering for social interaction, imagination, participation, balance and coordination, strength development and risk assessment through climbing, while most importantly allowing for fun activities and bringing an increased sense of belonging to the community. The playground will be broken down into areas of play that are focused around a central mound which is sited under the existing shade structure. Other spaces surrounding the mound will be focused towards different play types and opportunity for rest and gathering.

The theme for the playground aims to relate to the location near the sea, while there is a focus in the design on reusing materials and giving consideration to the existing shade and sun aspect.

PLAY ELEMENTS

- 1 Install maze with 1-1.6m high recycled plastic battens, on a mulch surface. Integrate perimeter plantings to accommodate 'hiding' and 'seeking' play element.
- 2 Construct blue whale wall with climbing tunnels, on sand surface.
- 3 Install swing set, including toddler seats and a basket seat.
- 4 Provide a theme play 'tug boat' with sensory play items, 'washed up' on grade on the mound base.
- 5 Provide climbing pyramid structure.
- 6 Install a 2.5m left hand turn stainless steel embankment slide.
- 7 Provide a knotted pull up rope climbing feature, with anchored points at top and bottom of the mound.
- 8 Install a three point anchored 'above grade' taut rope climbing feature and rock climbing holds.

LEGEND

- SOFTFALL RUBBER SURFACE
- SANDSTONE RETAINING WALL
- 19MM PILE SYNTHETIC GRASS
- PROPOSED SPOT LEVEL
- CONCRETE SURFACE
- MULCH SURFACE
- SHADE STRUCTURE
- MOUND CLIMBING BOULDERS
- ROCK CLIMBING HOLDS
- SAFETY FENCING/GATE ACCESS
- BENCH SEAT
- PICNIC PALETTE TABLE
- VEGETATION

FRENCHMANS BAY
PLAYGROUND DEVELOPMENT

LANDSCAPE CONCEPT PLAN
Design: Landscape Architecture | Technical Services | City Services
Issue: For Information

PLAY ELEMENTS

Install a maze constructed out of recycled plastic. Provide swings with a basket swing, a whale feature wall and a climbing pyramid.

CENTRAL MOUND

Create a 1.6 metre high mound centred under the existing shade structure. Provide climbing elements through pull up ropes, climbing boulders, rock holds, as well as a large embankment slide and a theme play 'tug boat'.

AMENITY

Retain the existing shade structure and provide additional plantings and landscaping. Provide safety fencing, bench and picnic palette seating.
